

Alberto Bacchelli

University of Zurich

about

Dr. Bacchelli is an SNSF assistant professor of **Empirical Software Engineering** at University of Zurich, Switzerland, where he leads the Zurich Empirical Software Engineering Team (ZEST).

His broader research vision is to move software engineering away from decisions based on intuition, or development activities painstakingly conducted manually, into solutions created using data-driven mathematical models, which make use of the large amount of information available during the software engineering process.

He is recipient of in total six Best Paper Awards and ACM SIGSOFT Distinguished Paper Awards, awarded from the top academic venues in software engineering and computer supported collaborative work.

professional memberships

ACM

education

- 04.2009–06.2013 **Ph.D.** in Informatics Università della Svizzera Italiana, Switzerland
Thesis: *Mining Unstructured Software Data*
Supervisor: *Prof. Dr. Michele Lanza*
- 04.2006–03.2008 **M.Sc.** in Computer Science University of Bologna, Italy
Final grade: *110/110 cum laude*
- 09.2006–06.2007 **M.Sc. year** within EU Erasmus program Université Libre de Bruxelles, Belgium
Main subjects: Software Engineering and Probabilistic Models
- 09.2002–03.2006 **B.Sc.** in Computer Science University of Bologna, Italy
Final grade: *110/110 cum laude*

professional appointments

- 08.2017–now **SNSF Assistant professor** University of Zurich, Switzerland
Research and teaching about empirical software engineering.
- 09.2013–08.2017 **Assistant professor (tenured after tenure-track)** TU Delft, The Netherlands
Research in software engineering with focus on peer code review and mining unstructured software data. Teaching 3 courses (B.Sc. and M.Sc.) and supervising M.Sc. as well as Ph.D. students.
- 04–08.2013 **Microsoft Research intern** Microsoft Research, Redmond, USA
Work on two projects: (1) visualization of code reviews to support understanding and (2) investigating and implementing a system for reviewer recommendation.
- 05–08.2012 **Microsoft Research intern** Microsoft Research, Redmond, USA
Work on two projects: (1) data mining approach to link code reviews and code commits and (2) investigating tool-based code review at Microsoft.
- 04.2008–04.2009 **Software Engineer** CINECA, Italy
Design and implementation of an automatic test suite for producing, collecting, and analyzing data to test a large-scale web application to manage universities.

research

awards and honors

- 2020 **Mining Software Repositories Ric Holt Early Career Achievement Award** MSR 2020
Awarded to junior researchers who provided outstanding contributions in the field.
- ACM SIGSOFT Distinguished Artifact Award** ICSE 2020
Artifact of “Primers or Reminders? The Effects of Existing Review Comments on Code Review”
- 2018 **Best Paper Honorable Mention** CSCW 2018
“Information Needs in Contemporary Code Review”
- 2017 **ACM SIGSOFT Distinguished Paper Award** MSR 2017
“Classifying code comments in Java open-source software systems”
- 2016 **ACM SIGSOFT Distinguished Paper Award** ICSE 2016
“Work Practices and Challenges in Pull-Based Development: The Contributor’s Perspective”
- 2015 **Best Paper Award** CSCW 2015
“Supporting Developers’ Coordination in The IDE”
- 2014 **Google Faculty Research Award** Google 2014
Program focused on funding world-class technical research in Computer Science and Engineering.
- 2009 **Best Paper Award** WCRE 2009
“Benchmarking Lightweight Techniques to Link E-Mails and Source Code”
- 2008 **Best Paper Award** ICSEA 2008
“On the Effectiveness of Manual and Automatic Unit Test Generation”

nominations for awards and honors

- 2018 **Nomination for ACM SIGSOFT Distinguished Paper Award** ESEC/FSE 2018
“What Makes A Code Change Easier To Review: An Empirical Investigation On Code Change Reviewability”
- 2016 **Nomination for Best Paper Award** ICSME 2016
“On the reaction to deprecation of 25,357 clients of 4+1 popular Java APIs”
- 2015 **Nomination for Best Paper Award** SANER 2015
“Untangling Fine-Grained Code Changes”
- 2014 **Finalist for the Cor Baayen Award** ERCIM 2014
ERCIM awards promising young researchers in computer science and applied mathematics.
- 2013 **Nomination for ACM SIGSOFT Distinguished Paper Award** ICSE 2013
“Expectations, Outcomes, and Challenges of Modern Code Review”

grants and funding

- | | | |
|------|---|------------------------------|
| 2019 | Hasler Stiftung - Test Authority: A New Path to Measure Test Quality
Defining a new way to measure test quality beyond code coverage. | Co-PI – approx. 50k CHF |
| 2018 | AdNovum - Knowledge Awareness in Solution Development Lifecycle
On software artifacts traceability for code reuse. | Co-PI – 60k CHF |
| 2017 | SNSF Professorship - Data-driven Contemporary Code Review
On transforming code review into an engineering approach. | PI – approx. 1.5M CHF |
| 2016 | STW Take Off - PReview Code
On an approach to improve the understandability of changes under review. | PI – 40k EUR |
| 2015 | NWO Top-1 grant - Persistent Code Reviewing
On investigating techniques to persist and generalize code review efforts. | Co-PI – approx. 650k EUR |
| 2014 | EU Horizon 2020 MSCA-ITN-2014-EID - SENECA
On data science for software engineering in the cloud. | Co-PI – 255k EUR of 2.2M EUR |
| | INRIA Associate Team - Improving code review tools
On creating novel code review tools for dynamically typed languages. | Co-PI – 10K EUR |
| | Google Faculty Research Award
On investigating the code review process. | PI – approx. 50k EUR |

invited talks

- 2019 **Software Analytics: Understanding and Supporting Programming With Data** St. Gallen, Switzerland
University of St. Gallen
- Contemporary Code Review Practices** Shenzhen, China
Huawei Technologies Co., Ltd.
- 2018 **What Do Code Reviews at Microsoft and in OSS Have in Common?** Zurich, Switzerland
adesso Schweiz
- 2017 **Evidence-based Code Review** London, United Kingdom
56th CREST Open Workshop, University College London
- Contemporary Peer Code Review** Zurich, Switzerland
Software Evolution and Architecture Lab, University of Zurich
- 2016 **Advances in Code Review** Amsterdam, The Netherlands
BESTSELLER
- What Do Code Reviews at Microsoft and in OSS Have in Common?** Bruxelles, Belgium
FOSDEM 2016
- Data-driven Contemporary Code Review** Zurich, Switzerland
University of Zurich, Switzerland
- Data-driven Contemporary Code Review** Lugano, Switzerland
Università della Svizzera Italiana, Switzerland
- 2015 **Code review needs the right approach** Bodegraven, The Netherlands
Stabiplan BV
- Expectations, Outcomes, and Challenges of Modern Code Review** Berlin, Germany
Software engineering research group (AG SE), Freie Universität Berlin
- Software Analytics needs the right data and the right questions** London, England
Software Systems Engineering Group, University College London
- Mining Unstructured Software Data** Nijmegen, The Netherlands
Digital security group, Radboud Universiteit Nijmegen
- Supporting Developers' Teamwork in The IDE** Vancouver, BC, Canada
Software Analysis and Testing (SALT) lab, University of British Columbia
- 2014 **Mining Unstructured Software Data** Namur, Belgium
PReCISE Research Center, Université de Namur
- 2012 **Pearls In The MUD, Mining Structured Data in NL Artifacts** Delft, The Netherlands
Software Engineering Research Group (SERG), TU Delft
- Mining Development Email Archives** Victoria, Canada
Computer Human Interaction & Software Engineering Lab, University of Victoria
- Mining Development Email Archives** Montreal, QC, Canada
SOCCER Lab, École Polytechnique de Montréal
- Mining Development Email Archives** Kingston, ON, Canada
Software Analysis and Intelligence Lab, Queen's University

- 2018 ASE (PC member), ESEC/FSE (PC member), ICPC (PC member), MSR (PC member, SC member)
- 2017 ESEC/FSE (PC member), ICSE (PC member)
- 2016 ICSE (PC member), ICPC (PC member), ICSME (Tool demo track, co-chair), IWESEP (PC member), MSR (PC member), MUD (SC member), SANER (ERA track, co-chair),
- 2015 ASE (Tool demo track, PC member), FSE (Tool demo track, PC member), ICPC (PC member), ICSE (social networking co-chair), ICSME (PC member), ISEC (PC member), MSR (PC member), MUD (SC member), SANER (PC member)
- 2014 ACM SRC (PC member), CSEE&T (PC member), CSMR-WCRE (PC member), ECOOP (artifact evaluation, PC member), ICSME (PC member), MSR (PC member), MUD (co-organizer)
- 2013 CSS&T (PC member), CSMR (ERA track, PC member) ICPC (ERA track, PC member), ICSM (Tool demo track, PC member), MSR (Mining challenge chair), MUD (co-organizer), NaturalLISE (co-organizer), WCRE (PC member)
- 2012 CSEE&T (PC member), CSMR (publicity chair), ICSM (publicity chair), MSR (Mining challenge, PC member), MUD (co-organizer)

journal referee

- TOSEM** ACM Transactions on Software Engineering and Methodology, ACM.
- TSE** IEEE Transactions on Software Engineering, IEEE Computer Society.
- EMSE** Empirical Software Engineering: An International Journal, Springer.
- JSEP** Journal of Software: Evolution and Process (formerly known as Journal on Software Maintenance and Evolution: Research and Practice, JSME), John Wiley & Sons.
- JSS** Journal of Systems and Software, Elsevier.
- PeerJ** PeerJ Computer Science.

Reviewer for Funding Organizations

- Chan Zuckerberg Initiative** Reviewer for the Essential Open Source Software for Science initiative.
Years: 2019, 2020.
- DFG, German Research Foundation** Reviewer for Project Proposals.
Year 2019.
- SNF, Swiss National Science Foundation** Reviewer for Project Proposals.
Year 2014.

Miscellanea

- ACM SIGSOFT** Committee member for the Doctoral Dissertation Award 2020.

teaching

instructor

- 2018–2019 **SHSG Summer School (B. Sc. and M.Sc.)** instructor – HSG
Students from St. Gallen University without knowledge in programming learn how to program.
- Data Science for Software Engineering (B.Sc. and M.Sc.)** instructor – University of Zurich
This edition continued the structure of the previous one.
- Software Testing (B. Sc. and M.Sc.)** co-instructor – University of Zurich
Teaching theoretical and practical aspects of software testing.
- START Hackademy (B.Sc. and M.Sc.)** instructor – University of Zurich
Students from St. Gallen University without knowledge in programming learn how to program.
- 2017–2018 **SHSG Summer School (B. Sc. and M.Sc.)** instructor – HSG
Students from St. Gallen University without knowledge in programming learn how to program.
- Data Science for Software Engineering (B.Sc. and M.Sc.)** instructor – University of Zurich
Students explore the topic and work on creating a research proposal on a novel idea.
- START Hackademy (B.Sc. and M.Sc.)** instructor – University of Zurich
Students from St. Gallen University without knowledge in programming learn how to program.
- Mining Software Repositories (M.Sc.)** instructor – TU Delft
This edition of the course has seen an increase in the involvement of my supervised Ph.D. students, in order to make them gain experience in advising Master students on topics related to their Ph.D. tracks.
- Software Engineering Methods (B.Sc.)** co-instructor – TU Delft
This edition was taught together with Dr. Palomba. A significant addition to the course regarded aspects of software security and defensive programming.
- 2015 ... 2017 **Context Project (B.Sc.)** co-coordinator, SE instructor, and context teacher – TU Delft
These editions continued the structure of the previous one.
- Mining Software Repositories (M.Sc.)** instructor – TU Delft
These editions continued the structure of the previous one.
- Software Engineering Methods (B.Sc.)** instructor – TU Delft
These editions continued the structure of the previous one.
- 2014–2015 **Context Project (B.Sc.)** co-coordinator and SE instructor – TU Delft
In this edition of the course, I also introduced the use of pull-based development model (on GitHub), static analysis tools, and code reviews.
- Mining Software Repositories (M.Sc.)** instructor – TU Delft
Students learn about recent research on software analytics and implement a full data mining approach, from data collection and analysis scripts to final report writing.
- Software Engineering Methods (B.Sc.)** instructor – TU Delft
In this edition, I introduced a group project. Students develop a fully working game and iterate over it using SCRUM and guided by weekly assignments.
- 2013–2014 **Context Project (B.Sc.)** co-coordinator and SE instructor – TU Delft
Students learn to develop, implement, validate, present, and demonstrate a software product that satisfies the needs of an external party in a given non-ICT context. I co-coordinate the 8 teachers involved and I am responsible for supervising and evaluating the software engineering aspects of the course.
- Software Evolution Seminars (M.Sc.)** co-instructor – TU Delft
Students form groups of two and present and debate in class recent papers about software evolution. The teachers guide the discussion and evaluate students' presentations and participation in debates.
- Software Engineering Methods (B.Sc.)** instructor – TU Delft
Students learn the basics of software engineering. Topics include requirements engineering, advanced OO programming, design patterns, UML, agile methodologies, software visualization.

Complete list of publications - Alberto Bacchelli

Peer-reviewed conferences are accepted in software engineering as high-quality scholarly articles. This point is expressed in the article “Research Evaluation for Computer Science” in *Communications of the ACM* (April 2009).¹

The ACM/IEEE International Conference on Software Engineering (ICSE) and the ACM SIGSOFT International Symposium on the Foundations of Software Engineering (ESEC/FSE) are considered the most prestigious conferences, with the highest standards in the software engineering field.² I have published 12 papers in the main tracks at ICSE and FSE, of which two have been nominated for an ACM SIGSOFT Distinguished Paper Award (ICSE 2013, FSE 2018) and one has received an ACM SIGSOFT Distinguished Paper Award (ICSE 2016).

The ACM CHI Conference on Human Factors in Computing Systems (CHI) and ACM Conference on Computer-Supported Cooperative Work and Social Computing (CSCW) are considered the most prestigious conferences, with the highest standards in the human computer interaction field. I have published 3 papers in the main tracks at CHI and CSCW, of which one has received a best paper honorable mention (CSCW 2018) and one has received a best paper award (CSCW 2015).

According to Google scholar (Jul 1, 2020), my h-index is 26 with 2,985 citations showing an upward trend.

Figure 1: Citations per year, according to Google Scholar on Jul 1, 2020.

international peer-reviewed conference papers

[CHI 2020] UI Dark Patterns and Where to Find Them

Linda Di Geronimo, Larissa Braz, Fabio Palomba, Enrico Fregnan, Alberto Bacchelli
ACM CHI Conference on Human Factors in Computing Systems, pp. 1–14, 2020

[ICSE 2020] Primers or Reminders? The Effects of Existing Review Comments on Code Review

Davide Spadini, Gül Çalikli, Alberto Bacchelli
42nd ACM/IEEE International Conference on Software Engineering, pp. 1171–1182, 2020
ACM SIGSOFT Distinguished Artifact Award

[MSR 2020] Investigating Severity Thresholds for Test Smells

Davide Spadini, Martin Schvarcbacher, Ana Oprescu, Magiel Bruntink, Alberto Bacchelli
17th International Conference on Mining Software Repositories, forthcoming, 2020

[ICSE 2019] When Code Completion Fails: A Case Study On Real-World Completions

Vincent Hellendoorn, Sebastian Proksch, Harald C. Gall, Alberto Bacchelli
41st ACM/IEEE International Conference on Software Engineering, pp. 960–970, 2019

[ICSE 2019] Test-Driven Code Review: An Empirical Study

Davide Spadini, Fabio Palomba, Tobias Baum, Stefan Hanenberg, Magiel Bruntink, Alberto Bacchelli

¹This point is also underlined by Michael D. Ernst (Professor at the University of Washington, and previously researcher at Microsoft Research and tenured professor at MIT): “conference papers are arguably more prestigious than journal publications: oftentimes, conferences have higher standards and lower acceptance rates.” For a copy: <http://sback.it/other/ernst-conf-vs-journal-uscis.pdf>.

²This is also expressed in the article: “Automatic and versatile publications ranking for research institutions and scholars” in *Comm. of the ACM* (June 2007)

41st ACM/IEEE International Conference on Software Engineering, pp. 1061–1072, 2019

[MSR 2019 - Tool] PathMiner: A Library for Mining of Path-Based Representations of Code

Vladimir Kovalenko, Egor Bogomolov, Timofey Bryksin, [Alberto Bacchelli](#)

16th International Conference on Mining Software Repositories, pp. 13–17, 2019

[MSR 2019] On the Effectiveness of Manual and Automatic Unit Test Generation: Ten Years Later

Domenico Serra, Giovanni Grano, Fabio Palomba, Filomena Ferrucci, Harald C. Gall, [Alberto Bacchelli](#)

16th International Conference on Mining Software Repositories, pp. 121–125, 2019

[ESEC/FSE 2019] Understanding Flaky Tests: The Developer’s Perspective

Moritz Eck, Fabio Palomba, Marco Castelluccio, [Alberto Bacchelli](#)

27th ACM Joint European Software Engineering Conference and Symposium on the Foundations of Software Engineering, pp. 830–840, 2019

[CSCW 2018] Information Needs in Contemporary Code Review

Luca Pascarella, Davide Spadini, Fabio Palomba, Magiel Bruntink, [Alberto Bacchelli](#)

21st ACM conference on Computer-Supported Cooperative Work and Social Computing, 135:1–135:27, 2018

Best Paper Honorable Mention

[MOBILESoft 2018] Self-reported activities of Android developers

Luca Pascarella, Fabio Palomba, Franz-Xaver Geiger, Dario Di Nucci, Ivano Malavolta, [Alberto Bacchelli](#)

5th International Conference on Mobile Software Engineering and Systems, pp. 144–155, 2018

[ICSE 2018 - SEIP] Modern Code Review: A Case Study at Google

Caitlin Sadowski, Emma Söderberg, Luke Church, Michal Sipko, [Alberto Bacchelli](#)

40th ACM/IEEE International Conference on Software Engineering, Software Engineering in Practice Track, pp. 181–190, 2018

[ICSE 2018] Understanding Developers’ Needs on Deprecation as a Language Feature

Anand Ashok Sawant, Mauricio Aniche, Arie van Deursen, [Alberto Bacchelli](#)

40th ACM/IEEE International Conference on Software Engineering, pp. 561–571, 2018

[ICSE 2018] When Testing Meets Code Review: Why and How Developers Review Tests

Davide Spadini, Mauricio Aniche, Margaret Storey, Magiel Bruntink, [Alberto Bacchelli](#)

40th ACM/IEEE International Conference on Software Engineering, pp. 677–687, 2018

[ICSME 2018] On The Relation of Test Smells to Software Code Quality

Davide Spadini, Fabio Palomba, Andy Zaidman, Magiel Bruntink, [Alberto Bacchelli](#)

34th IEEE International Conference on Software Maintenance and Evolution, pp. 1–12, 2018

[ICSME 2018] Why are features deprecated? An investigation into the motivation behind deprecation

Anand Ashok Sawant, Guangzhe Huanag, Gabriel Vilen, Stefan Stojkovski, [Alberto Bacchelli](#)

34th IEEE International Conference on Software Maintenance and Evolution, pp. 13–24, 2018

[ASE 2018] Mining File Histories: Should We Consider Branches?

Vladimir Kovalenko, Fabio Palomba, [Alberto Bacchelli](#)

33rd IEEE/ACM International Conference on Automated Software Engineering, pp. 202–213, 2018

[ASE 2018 - New Ideas] Continuous Code Quality: Are We (Really) Doing That?

Carmine Vassallo, Fabio Palomba, [Alberto Bacchelli](#), Harald C. Gall

33rd IEEE/ACM International Conference on Automated Software Engineering, New Ideas Track, pp. 790–795, 2018

[MSR 2018 - Data] A graph-based dataset of commit history of real-world Android apps

Franz-Xaver Geiger, Ivano Malavolta, Luca Pascarella, Fabio Palomba, Dario Di Nucci, [Alberto Bacchelli](#)

15th International Conference on Mining Software Repositories, Data Track, pp. 30–33, 2018

[MSR 2018] How Is Video Game Development Different from Software Development in Open Source?

Luca Pascarella, Fabio Palomba, Massimiliano Di Penta, [Alberto Bacchelli](#)

15th International Conference on Mining Software Repositories, pp. 392–402, 2018

[ESEC/FSE 2018] What Makes A Code Change Easier To Review: An Empirical Investigation On Code Change Reviewability

Achyudh Ram, Anand Ashok Sawant, Marco Castelluccio, [Alberto Bacchelli](#)

26th ACM Joint European Software Engineering Conference and Symposium on the Foundations of Software Engineering, pp. 201–212, 2018

Nominated for ACM SIGSOFT Distinguished Paper Award

[ESEC/FSE 2018 - Tool Demo] PyDriller: Python framework for mining software repositories

Davide Spadini, Mauricio Finavaro Aniche, [Alberto Bacchelli](#)

26th ACM Joint European Software Engineering Conference and Symposium on the Foundations of Software Engineering, pp. 908–911, 2018

[SANER 2018] Re-evaluating method-level bug prediction

Luca Pascarella, Fabio Palomba, [Alberto Bacchelli](#)

25th International Conference on Software Analysis, Evolution and Reengineering, RENE track, pp. 592–601, 2018

[ICSE 2017 - Introspection] Double-blind review in software engineering venues: the community’s perspective

[Alberto Bacchelli](#), Moritz Beller

39th ACM/IEEE International Conference on Software Engineering (Companion Volume), pp. 385–396, 2017

[ICSME 2017] On the Optimal Order of Reading Source Code Changes for Review

Tobias Baum, Kurt Schneider, [Alberto Bacchelli](#)

33rd IEEE International Conference on Software Maintenance and Evolution, pp. 329–340, 2017

[MSR 2017] Classifying code comments in Java open-source software systems

Luca Pascarella, [Alberto Bacchelli](#)

14th International Conference on Mining Software Repositories, pp. 227–237, 2017

ACM SIGSOFT Distinguished Paper Award

[MSR 2017] To mock or not to mock? An empirical study on mocking practices

Davide Spadini, Mauricio Aniche, Magiel Bruntink, [Alberto Bacchelli](#)

14th International Conference on Mining Software Repositories, pp. 402–412, 2017

[ESEM 2016] Social Diversity and Activity Levels of Open Source Software Projects on GitHub

Joop Aué, Michiel Haisma, Kristin Fjola Tomasdottir, [Alberto Bacchelli](#)

10th International Symposium on Empirical Software Engineering and Measurement, 41:1–41:6, 2016

[GECCO 2016] A Search-based Training Algorithm for Cost-aware Defect Prediction

Annibale Panichella, Carol V. Alexandru, Sebastiano Panichella, [Alberto Bacchelli](#), Harald C. Gall

Genetic and Evolutionary Computation Conference, pp. 1077–1084, 2016

[ICSE 2016] Work Practices and Challenges in Pull-Based Development: The Contributor’s Perspective

Georgios Gousios, Margaret-Anne Storey, [Alberto Bacchelli](#)

38th ACM/IEEE International Conference on Software Engineering, pp. 285–296, 2016

ACM SIGSOFT Distinguished Paper Award

[ICSE 2016] On the “Naturalness” of Buggy Code

Baishakhi Ray, Vincent Hellendoorn, Saheel Godhane, Zhaopeng Tu, [Alberto Bacchelli](#), Premkumar Devanbu

38th ACM/IEEE International Conference on Software Engineering, pp. 428–439, 2016

[ICSME 2016] On the reaction to deprecation of 25,357 clients of 4+1 popular Java APIs

Anand Sawant, Romain Robbes, [Alberto Bacchelli](#)

32nd International Conference on Software Maintenance and Evolution, pp. 400–410, 2016

Nominated for Best Paper Award

[SCAM 2016] A Security Perspective on Code Review: The Case of Chromium.

Marco Biase, Magiel Bruntink, [Alberto Bacchelli](#)

16th IEEE International Working Conference on Source Code Analysis and Manipulation, pp. 21–30, 2016

[FSE 2016 - Tool Demo] Visualizing code and coverage changes for code review

Sebastian Oosterwaal, Arie Deursen, Roberta Coelho, Anand Ashok Sawant, [Alberto Bacchelli](#)

24th ACM SIGSOFT International Symposium on Foundations of Software Engineering, pp. 1038–1041, 2016

[CSCW 2015] Supporting Developers’ Coordination in the IDE

Anja Guzzi, [Alberto Bacchelli](#), Yann Riche, Arie van Deursen

18th ACM conference on Computer-Supported Cooperative Work and Social Computing, pp. 518–532, 2015

Best Paper Award

[MSR 2015] Will they like this? Evaluating Code Contributions With Language Models

Vincent Hellendoorn, Premkumar Devanbu, [Alberto Bacchelli](#)

12th Working Conference on Mining Software Repositories, pp. 157–167, 2015

[MSR 2015 - Data] A Dataset For API Usage

Anand Sawant, [Alberto Bacchelli](#)

12th Working Conference on Mining Software Repositories, Data Track, pp. 506–509, 2015

[SANER 2015] Untangling Fine-Grained Code Changes

Martin Dias, [Alberto Bacchelli](#), Georgios Gousios, Damien Cassou, Stéphane Ducasse

22nd IEEE International Conference on Software Analysis, Evolution, and Reengineering, pp. 341–350, 2015

Nominated for Best Paper Award

[ICSME 2014] Improving Low Quality Stack Overflow Post Detection

- Luca Ponzanelli, Andrea Mocci, [Alberto Bacchelli](#), Michele Lanza, David Fullerton
30th International Conference on Software Maintenance and Evolution, Industrial Track, pp. 541–544, 2014
- [MSR 2014] Modern Code Reviews in Open-Source Projects: Which Problems Do They fix?
Moritz Beller, [Alberto Bacchelli](#), Andy Zaidman, Elmar Juergens
11th Working Conference on Mining Software Repositories, pp. 202–211, 2014
- [QSIK 2014] Quantitatively Exploring Non-code Software Artifacts
Luca Bigliardi, Michele Lanza, [Alberto Bacchelli](#), Marco D'Ambros
14th International Conference on Quality Software, pp. 286–295, 2014
- [QSIK 2014] Understanding and Classifying the Quality of Technical Forum Questions
Luca Ponzanelli, Andrea Mocci, [Alberto Bacchelli](#), Michele Lanza
14th International Conference on Quality Software, pp. 343–352, 2014
- [CSMR 2013] Leveraging Crowd Knowledge for Software Comprehension and Development
Luca Ponzanelli, [Alberto Bacchelli](#), Michele Lanza
17th European Conference on Software Maintenance and Reengineering, pp. 57–66, 2013
- [ICSE 2013] Expectations, Outcomes, and Challenges of Modern Code Review
[Alberto Bacchelli](#), Christian Bird
35th ACM/IEEE International Conference on Software Engineering, pp. 710–719, 2013
Nominated for ACM SIGSOFT Distinguished Paper Award
- [ICSE 2013 - Tool Demo] Seahawk: Stack Overflow in the IDE
Luca Ponzanelli, [Alberto Bacchelli](#), Michele Lanza
35th International Conference on Software Engineering, Tool Demo Track, pp. 1295–1298, 2013
- [ICSM 2013 - ERA] Which Feature Location Technique is Better?
Emily Hill, [Alberto Bacchelli](#), Dave W. Binkley, Bogdan Dit, Dawn J. Lawrie, Rocco Oliveto
29th IEEE International Conference on Software Maintenance, pp. 408–411, 2013
- [ICPC 2013] Manhattan: Supporting Real-Time Visual Team Activity Awareness
Michele Lanza, Marco D'Ambros, [Alberto Bacchelli](#), Lile Hattori, Francesco Rigotti
21st IEEE International Conference on Program Comprehension, ERA Track, pp. 207–210, 2013
- [MSR 2013] Communication in Open Source Software Development Mailing Lists
Anja Guzzi, [Alberto Bacchelli](#), Michele Lanza, Martin Pinzger, Arie Deursen
10th IEEE Working Conference on Mining Software Repositories, pp. 277–286, 2013
- [ICSE 2012] Content Classification of Development Emails
[Alberto Bacchelli](#), Tommaso Sasso, Marco D'Ambros, Michele Lanza
34th ACM/IEEE International Conference on Software Engineering, pp. 375–385, 2012
- [CSMR 2011] RTFM (Read The Factual Mails) –Augmenting Program Comprehension with REmail
[Alberto Bacchelli](#), Michele Lanza, Vitezslav Humpa
15th IEEE European Conference on Software Maintenance and Reengineering, pp. 15–24, 2011
- [ICSE 2011 - Tool Demo] Miler: A Toolset for Exploring Email Data
[Alberto Bacchelli](#), Michele Lanza, Marco D'Ambros
33rd ACM/IEEE International Conference on Software Engineering, pp. 1025–1027, 2011
- [ICSE 2011 - DocSym] Exploring, exposing, and exploiting emails to include human factors in software engineering
[Alberto Bacchelli](#)
33rd ACM/IEEE International Conference on Software Engineering, pp. 1074–1077, 2011
- [ASE 2011] Extracting Structured Data from Natural Language Documents with Island Parsing
[Alberto Bacchelli](#), Anthony Cleve, Michele Lanza, Andrea Mocci
26th IEEE/ACM International Conference On Automated Software Engineering, pp. 476–479, 2011
- [FASE 2010] Are Popular Classes More Defect Prone?
[Alberto Bacchelli](#), Marco D'Ambros, Michele Lanza
13th International Conference on Fundamental Approaches to Software Engineering, pp. 59–73, 2010
- [ICSE 2010] Linking E-Mails and Source Code Artifacts
[Alberto Bacchelli](#), Michele Lanza, Romain Robbes
32nd International Conference on Software Engineering, pp. 375–384, 2010

[ICPC 2010] Extracting Source Code from E-Mails

Alberto Bacchelli, Marco D'Ambros, Michele Lanza
18th IEEE International Conference on Program Comprehension, pp. 24–33, 2010

[QSIC 2010] On the Impact of Design Flaws on Software Defects

Marco D'Ambros, Alberto Bacchelli, Michele Lanza
10th International Conference on Quality Software, pp. 23–31, 2010

[WCRE 2009] Benchmarking Lightweight Techniques to Link E-Mails and Source Code

Alberto Bacchelli, Marco D'Ambros, Michele Lanza, Romain Robbes
16th IEEE Working Conference on Reverse Engineering, pp. 205–214, 2009
Best Paper Award

[ICSEA 2008] On the Effectiveness of Manual and Automatic Unit Test Generation

Alberto Bacchelli, Paolo Ciancarini, Davide Rossi
3rd International Conference on Software Engineering Advances, pp. 252–257, 2008
Best Paper Award
